DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 8, 10-16, 19 and 21-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Gannoe (USPN 3389683).

Gannoe teaches a solder feeding device comprising a reservoir for solder (80,82), a drive unit (112), a control circuit (106) connected to first and second leads in connection with the drive unit (108,110) which electrical communication between the leads through the solder wherein feeding is driven by opening or closing of the circuit as the level of the solder changes (figure 5 and col 3 line 28 – col 4 line 8).

3. Claims 1-5, 10-16 and 21-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Kobayashi (JPN 02-46971 A).

Kobayashi teaches a solder feeding device comprising a reservoir for solder, a drive unit, a control circuit connected to first and second leads in connection with the drive unit which electrical communication between the leads through the solder wherein feeding is driven by opening or closing of the circuit as the level of the solder changes (abstract and figure 1).

Allowable Subject Matter

4. Claims 6, 7, 9, 17, 18, 20 and 27-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Corsaro (USPN 3570741, control circuit, leads), Buffington (USPN 2964007, mechanical control), Calehuff et al. (USPN 2986108) and Gruber et al. (USPN 6231333 B1).
